

**Optional equipment for our hydraulic  
dry cutting machine RST-350**

## Automatic Coil Feed

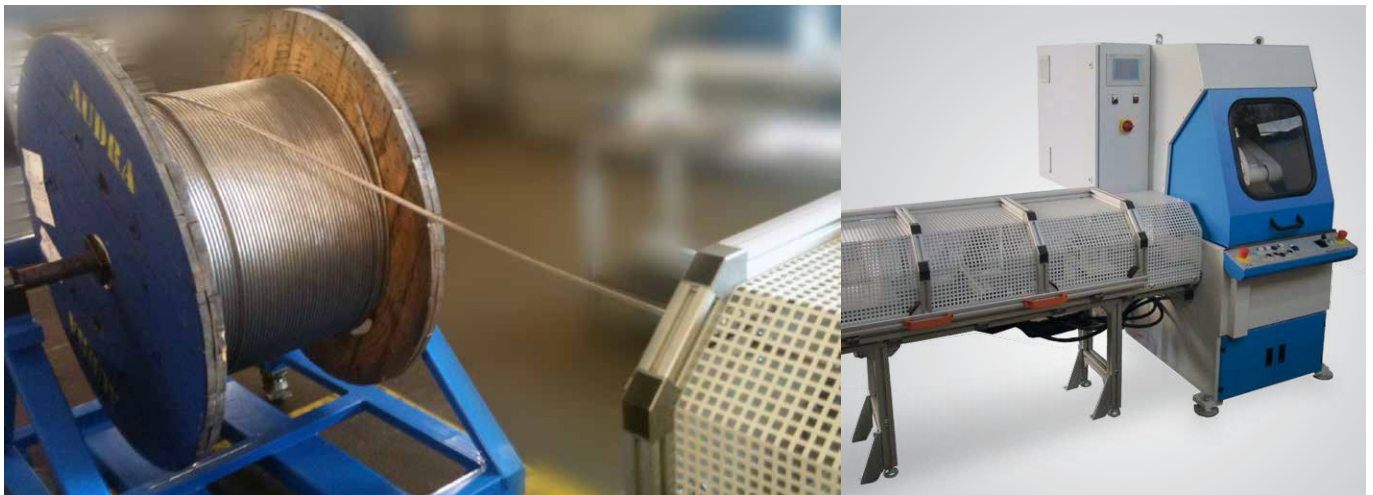

**This makes trimming and cutting even more economic!**

The use of coils offers considerable advantages for the processing of steel cables.

That's why we offer you the opportunity, to equip our RST-350 dry cutting machine with a fully automatic coil feed.

In combination with our customised feed and discharge units, the result is a highly efficient separation system with short cycle and separation times of just a few seconds. The system can be operated fully automatically, which reduces the costs per cut to a minimum.

All machines in this series are certified with the CE mark in accordance with EC Directive 2006/42EG.

### Your benefits:

- + **Elimination of trim cuts and remnants**
- + **Major storage and handling advantages**
- + **Flexible applications** thanks to various cut-off lengths
- + **Separately controlled walking beam**
- + **Automatic control** of the coil and gripper feed
- + **Integrated disc balancing monitoring** for constant circumferential speeds of the cutting disc, even when worn
- + **All feed parameters are adjustable** during the cutting process
- + **Quick changes and easy adjustments of the clamping shells** to different workpiece cross sections

## Technical details:

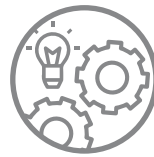

<b>Cross-sectional size of the parts to be clamped</b>	10 – 20 mm
<b>Cutting disc sizes</b>	up to max. Ø 350 mm
<b>Drive power</b>	7.5 kW
<b>Variable speed control</b>	63 – 80 m/s
<b>Gripper feed with integrated feed unit</b>	hydraulically controlled
<b>Ready to connect to</b>	dust extraction and exhaust systems
<b>Discharge channel (optional)</b>	for depositing workpieces

## We offer comprehensive services and know how:

### Processing of different materials:

High-strength steels  
Composite materials  
Glass fibre materials  
Carbide  
Casting  
Stainless steel  
Aluminum  
and many more ...

### Our portfolio:

Cutting machines  
Investment casting  
High performance cutting machines (wet and dry)  
Machines for metallographic test cuttings  
Machines for the steel and tube industry
