

Dry cutting machine RST-350

Efficient trimming and cutting of steel cables

Feeding from the coil offers for the processing of steel cables considerable pricing and consequently economic advantages: the elimination of trim cuts and remnants, major storage and handling advantages, compact coil storage etc..

With our fully automatically dry cutting machine RST-350 you are able to reduce your costs per cut to a minimum!

Technical details:

- Cross-sectional size of the parts to be clamped: 10 – 20 mm
- Cutting disc sizes up to a maximum diameter of 350 mm
- Variable speed control between 63 – 80 m/s
- Ready to connect to dust extraction and exhaust systems
- Optional: Discharge channel for depositing workpieces

Clamping diameters of 10–20 mm with exchangeable retainers

Fully automatic coil feed

All machines in this series are certified with the CE mark in accordance with EC Directive 2006/42EG.

Your benefits:

- + **Hydraulically controlled gripper feed with integrated feed unit**
- + **Automatic control of the coil and gripper feed**
- + **Separately controlled walking beam**
- + **Integrated disc balancing monitoring** for constant circumferential speeds of the cutting disc, even when worn
- + **All feed parameters are adjustable** during the cutting process
- + **Compact size and easy operation**
- + **Quick changes and easy adjustments of the clamping shells** to different workpiece cross sections
- + **Flexible applications** thanks to various cut-off lengths

Everything from a single source

Thanks to our integration into the **Pütz Group** and the resulting **synergy effects** we are able to offer you not just production and specialist cutting-off machines but also the appropriate testing technology to test surfaces as well as for dimensional accuracy.

We offer comprehensive services and know how:

Processing of different materials:

High-strength steels
Composite materials
Glass fibre materials
Carbide
Casting
Stainless steel
Aluminum
and many more ...

Our portfolio:

Cutting machines
Investment casting
High performance cutting machines (wet and dry)
Machines for metallographic test cuttings
Machines for the steel and tube industry
