Add-on system to the RSP-400 N series

Automated loading and feeding of your workpieces

With this add-on system, we are giving you the opportunity to automate the workpiece loading and feeding of your RSP-400 N series machine and thus to make your personnel deployment more efficient. The add-on system consists of a chain conveyor with transfer station and fully automatic feed.

Feed unit
with transfer
stationChain conveyor/
buffer loader with
20 loading spaces

Your benefits:

- + **Ideal for supplying and buffering** round bars as well as flat and guide rails
- + **Damage-free transfers** thanks to the integrated transfer station
- + **Accurate cutting length determination** thanks to the integrated linear feed unit
- + **Control and monitoring functions are integrated into the machine control**
- + **The inclined bed loader is loaded manually or by crane**
- + **Protection against interventions in the danger zone:** operating side with a **light grid**, back with a **protective fence**

**Chain conveyor:**

- For round bars with diameters of 10 mm – 40 mm as well as flat and guide rails of 10 mm – 40 mm
- 20 loading spaces (length approx. 6 000 mm)
- The transfer station lifts the workpiece from the loading space and transfers it to the feed unit via a driven belt

**Feed unit:**

- With an integrated linear feed unit (servo-linear axis of approx. 7 000 mm)
- With an integrated stainless steel tank for coolant return

EVERYTHING FROM A SINGLE SOURCE

Thanks to our integration into the **PÜTZ GROUP** and the resulting **synergy effects** we are able to offer you not just production and specialist cutting-off machines but also the appropriate testing technology to test surfaces as well as for dimensional accuracy.
