RST-350 dry cutting machine
with fully automatic coil feeder

Cost-effective cutting of steel cables to length

QUALITY MADE IN GERMANY
Special machines for your production

The RST-350 hydraulic dry cutting machine enables fully automatic processing and cutting to length of steel cables up to 20 mm in diameter – directly from the coil. The hydraulically operated gripper feed with integrated coil feeder ensures an efficient cutting process and reduces the cost per cut.

All machines in this series are CE marked in accordance with Machinery Directive 2006/42/EC.

Your benefits at a glance:

- **Cost-effective material processing**
- **Reduced cost per cut** trough fully automatic operation
- **Space-saving storage and easy handling** of coils
- **Flexible cut lengths for different requirements**
- **Compact design and easy operation**
- **Process reliability** through automatic monitoring of the coil and gripper feed

Smart engineering for efficient processes.

Technical features of the RST-350

- Cross-sectional size of the parts to be clamped: 10–20 mm
- Cutting disc diameter: max. 350 mm
- Variable speed control: 63–80 m/s
- Hydraulically controlled gripper feed with integrated feed unit
- Ready to connect to dust extraction and exhaust systems
- Optional: Discharge channel for depositing workpieces

Automatic monitoring of the coil and gripper feed.

Interchangeable clamping fixtures, for cable diameters of 10–20 mm.

Our new ticket system for support requests

Our new ticket system for support requests is now available – especially for urgent matters such as machine downtime or technical malfunctions.

Your request will be recorded in a structured format and forwarded directly to the appropriate specialist team. This allows us to process requests more quickly, ensure transparent workflows, and reduce response times.
